

# Traveling Water Rainbow Vocabulary

Absorb- Able to draw in or suck up liquid

Adhesion- When different types of particles like to stick together

Capillary Action- The movement of a liquid along or through another material without the help of gravity. This movement happens because the water wants to stick or adhere to the other material and pulls more water along with it.

Cohesion- When particles that are the same like to stick together

Observation- The act of noticing or paying attention

Prediction- An educated guess about what will happen

Primary Colors- Colors that can be mixed together to create new colors; Blue, Red, and Yellow
